

The World's First Autonomous Financial Operating System

"Don't just bank. Let your money think, plan, protect, and grow for you."

Team Name: Suchitra22

*Suchitra Satapathy,
Software Engineer,
Volvo Group*

The Problem

Banking is still reactive.

- Customers only interact with their bank when they need something.
- Banking apps wait for users to take action.
- Financial planning is complex and fragmented.
- Customers struggle with budgeting, investments, loans, insurance, taxes, and fraud protection.
- Generic product recommendations reduce engagement and trust.
- Banks lose opportunities because they cannot anticipate customer needs.

**Today's banking answers questions.
Tomorrow's banking should anticipate them.**

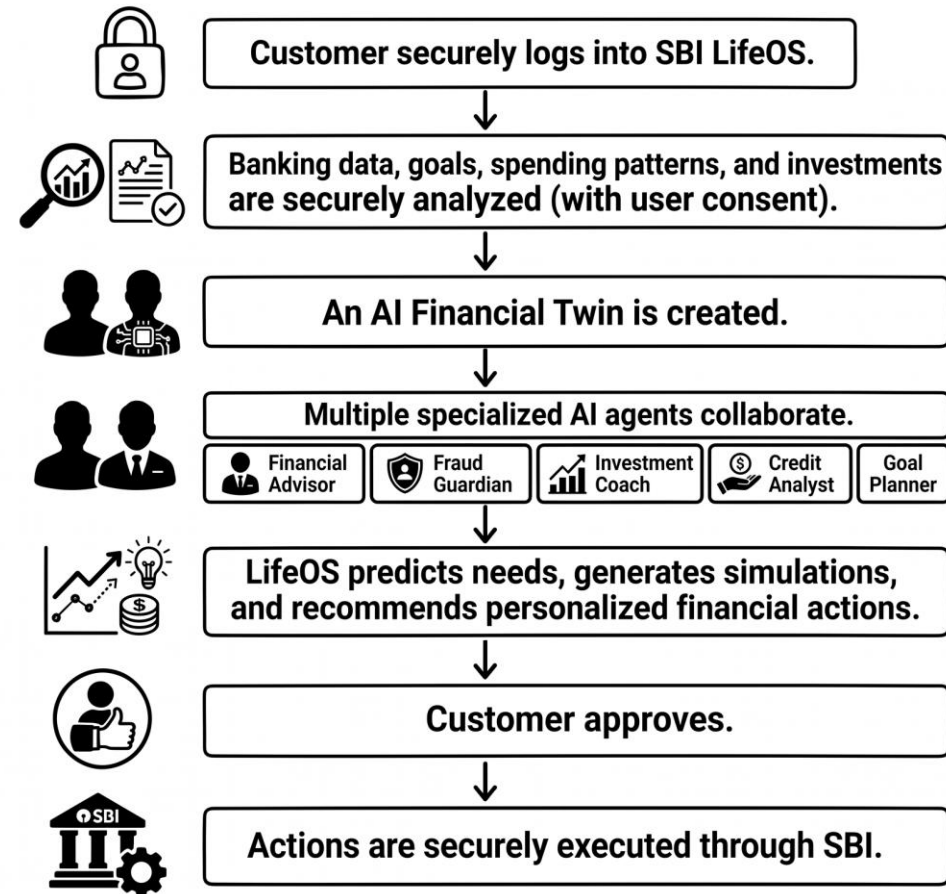

Our Vision

Imagine a bank that works for you 24×7.

- Introducing **SBI LifeOS**—an autonomous financial operating system powered by Agentic AI.
- Every customer receives an **AI Financial Twin** that continuously learns their financial behavior and proactively:
 - Plans finances
 - Predicts future needs
 - Prevents fraud
 - Optimizes spending
 - Guides investments
 - Helps achieve life goals

Instead of opening an app, **customers gain an intelligent financial partner.**

How It Works

Meet the AI Agents

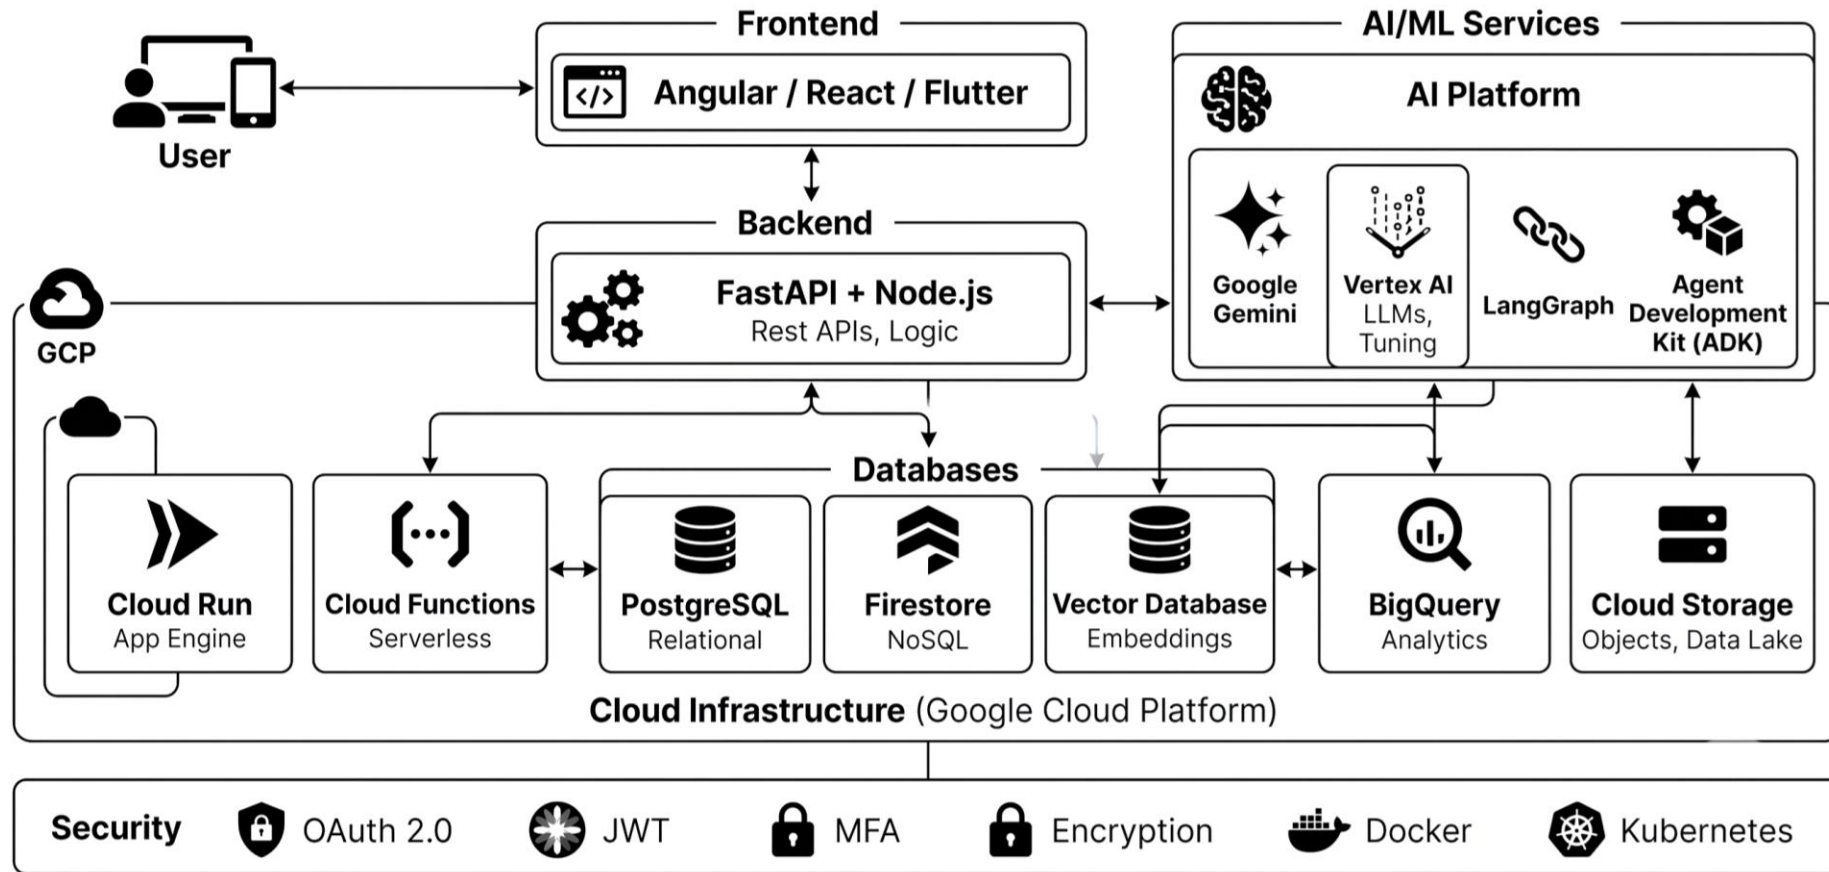

Specialized AI Agents working together

- **Financial Advisor** - Creates personalized financial roadmaps.
- **Fraud Guardian** - Detects suspicious transactions before they happen.
- **Goal Planner** - Plans for education, travel, marriage, retirement, and wealth.
- **Credit Analyst** - Predicts loan eligibility and EMI optimization.
- **Investment Coach** - Suggests investments aligned with goals and risk profile.
- **Insurance Advisor** - Recommends personalized protection plans.
- **Orchestrator Agent** - Coordinates all AI agents to provide one unified experience.

Key Features

- ✓ Autonomous Financial Planning
- ✓ Future Financial Simulations
- ✓ Smart Budget Optimization
- ✓ Personalized SBI Product Recommendations
- ✓ Predictive Fraud Detection
- ✓ Voice & Multilingual Banking
- ✓ Life Event Prediction
- ✓ Explainable AI
- ✓ 24×7 Financial Concierge

Technology Architecture

Business Value

Benefits for Customers

- Personalized banking
- Better financial decisions
- Fraud protection
- Goal-based financial planning
- One intelligent financial companion

Benefits for SBI

- Higher customer engagement
- Increased cross-selling
- Better customer retention
- Reduced support costs
- Improved fraud prevention
- Higher digital adoption
- AI-driven banking leadership

Why SBI LifeOS Wins?

Traditional Banking	SBI LifeOS
Reactive	Proactive
Manual Planning	AI Planning
Generic Products	Hyper-Personalized
Single Chatbot	Multi-Agent AI
One-Time Advice	Continuous Guidance
Transaction Focus	Life Goal Focus
Static Banking	Autonomous Banking

Not another chatbot.

An entirely new banking operating system.

The Future of Banking Starts Here

Our Vision

- From **Digital Banking** → To **Autonomous Banking** where AI doesn't simply answer questions but it continuously learns, protects, plans, predicts, and grows alongside every customer.

SBI LifeOS

- **The World's First Autonomous Financial Operating System**
- *"The future isn't a smarter banking app. The future is a bank that thinks before you ask."*

Live Demo Scenario

User: "Hi LifeOS, I want to buy a ₹25 lakh car next year."

The AI instantly:

- Simulates your cash flow for the next 5 years.
- Suggests the ideal loan and EMI.
- Predicts the impact on your retirement savings.
- Recommends the best insurance plan.
- Advises whether to buy now or wait six months.
- Shows how increasing your SIP by ₹2,000/month could offset the cost.
